

hi tech + srl: the present and the future of digital revolution

Rapid prototyping, 3D printing, constant evolution of biocompatible materials: they are the present and the future of the excellent dental sector.

hitech + S.r.l. is the partner of reference, able to accompany you and support you in the first steps and in subsequent ones, within the digital revolution thanks to twenty years of experience in 3D printing sector of which knows problems, evolution and advantages.

A know-how that hitech plus S.r.l. provides you with 7 days a week, 24 hours a day: consultancy before purchase, sale of the best models for 3D printing and laser scanning, post-sales consultancy on their use, identification and repair quickly of any malfunctions.

Technological progress promises ever simpler and faster production processes and previously impossible achievements, provided, however, that we rely on those who have made the diffusion of 3D printing, even in the dental sector, their mission.

Thanks to the introduction of new biocompatible materials the complex manual processes are now an old memory: today it is, in fact, possible to resort to 3D printing not only for the production of study models, but also prostheses that can be applied directly on the patient, who can thus benefit of maximum customization. In short, a technological revolution that promises sparks, in which, is important to choose the right partner.

hitech + S.r.l. is the first Asiga dealer in Italy.
